SUMMARY

Self-driven developer building Telegram bots and websites for small businesses. I combine development with real IT and networking background, so I understand both the product and the infrastructure behind it. I build with AI coding agents (Claude Code, OpenAI Codex, ChatGPT) to ship working products fast, and I work daily with a real AI computer-vision product in the field. My recent projects target what European businesses need now: GDPR-safe use of LLMs, structured e-invoicing, accessibility and network asset inventories.

PROJECTS

E-Invoice — Python, FastAPI, pdfplumber, lxml, Anthropic API

- Turns a PDF invoice into an XRechnung (UBL 2.1) e-invoice, for the EU move to structured e-invoicing (EN 16931; in Germany every business must accept them since 1 January 2025).
- Extraction with Claude (structured output) or offline rules, then 67 EN 16931 / XRechnung rules with their official IDs and a plain explanation each.
- Matches the official CEN and KoSIT rules on all five sample invoices; 180 tests. Case study

Helpdesk Copilot — Python, BM25 retrieval, Anthropic API, aiogram 3, FastAPI

- Telegram IT assistant that answers from the company's own how-tos with numbered sources; when it is not sure, it opens a ticket with a priority (P1–P4). Tells users they are talking to an AI (EU AI Act, Art. 50).
- Right document in the top 3 for 30 of 30 evaluation questions (15 of 15 held out); 95 tests. Case study

PII Guard — Python, FastAPI, HTMX, Anthropic API

- Gateway that hides personal data (e-mail, phones, IBAN, cards, EU VAT IDs, IP addresses) before a prompt reaches the LLM and puts it back into the answer (GDPR); mask / block / allow policy, audit log without values.
- A property test on 500 random texts shows no original value reaches the model; 152 tests. Case study

Hotel AI concierge — Python, aiogram 3, Anthropic / OpenAI API

- Telegram bot that answers guests in EN, RU, TR and DE only from the hotel's knowledge base; unknown questions go to staff and the reply is translated back to the guest.
- Offline demo mode, 57 tests. [Result with a real hotel, if any] Case study

Also built — each with a demo mode, tests and a case study on my site:

- **Allergen Labels** — the 14 EU allergens on every dish in four languages, confirmed by a chef before printing (207 tests).
- **Energy Saver** — runs boilers and EV chargers in the cheapest day-ahead slots; −29.6 % spot cost on 30 days of real German prices (100 tests).
- **Accessibility Check** — WCAG 2.2 checks for small business websites (European Accessibility Act) (200 tests).
- **Network Inventory** — asset register for office networks (NIS2): new devices, risky open ports (107 tests).
- **Fridge alert bot** (69 tests) and **uptime monitor** (45 tests) — Telegram alerts when a fridge gets too warm or a camera, router or access point goes down.

- **HookahPlace Lara website** (hookahplacelara.com) — [Add: what it does, result]
- **Portfolio website** — Next.js, TypeScript, MDX, four languages: site-production-898c.up.railway.app

EXPERIENCE

Technical Specialist — Steady Control (AI-powered business monitoring), Antalya · Oct 2026 – present

- Deploy and support an AI computer-vision system for hotels, cafes and restaurants; install and maintain the cameras, recorders, sensors and network equipment it runs on.

Freelance web development & IT support · Feb 2022 – present

SKILLS

Telegram Bot API, Python (FastAPI, aiogram 3, pytest), HTML/CSS, JavaScript, React Native/Expo (learning), Git, AI-assisted development (Claude Code, OpenAI Codex, ChatGPT), AI automation, LLM APIs (structured output), retrieval (BM25) and evaluation sets, PDF and XML processing (pdfplumber, lxml), SQLite.

LANGUAGES

Russian — native · English — A1 (basic), studying actively and ready to learn fast on site after relocation · Turkish — basic

Driving licence: category B

EDUCATION

[Degree, university, years]

BEYOND THE ROLE

Fast learner who picks up new tools and fields quickly. Builds Telegram bots and websites, uses AI tools for automation and content, has sales and client-service experience, drives (licence B). Open to new directions, relocation and contracts abroad.
